

From Browser to Production

My learning notes: the complete journey of a request from a user's browser to a production server.

```
User Browser → DNS → Internet → Firewall → Load Balancer → NGINX
→ Application Server → Spring Boot API → Database → Cache → Response → Browser
```

The learning method (why this structure)

Re-reading notes is one of the **least** effective study techniques. This course uses what actually works — **active recall + spaced repetition + hands-on labs**:

Each phase folder contains exactly two documents (each as `.md` + `.pdf`):

- **Phase-XX-Notes** — the full chapter: explanations, analogies, diagrams, commands, mistakes, best practices, interview questions, LAB, and the ASSIGNMENT.
- **Phase-XX-Revision-Sheet** — questions ONLY, no answers. You answer from memory, then check yourself against the notes.

The study loop per phase

1. READ the notes once (don't highlight, don't re-read)
2. DO the lab hands-on — typing, breaking, fixing
3. RECALL: take the Revision Sheet closed-book, score yourself
4. SOLVE the assignment → submit to Claude for review/exam
5. SPACED REVIEW: retake the Revision Sheet after 1 day, 3 days, 1 week, 1 month (only re-read the notes sections you failed)

Only move to the next phase after step 4 passes.

Roadmap & Progress

Phase	Topic	Notes	Revision	Status
00	Linux & Terminal Basics	Notes	Sheet	
01	Internet Fundamentals	Notes	Sheet	
02	DNS and Domains	Notes	Sheet	
03	HTTP and HTTPS	Notes	Sheet	
04	Linux Server Administration	Notes	Sheet	
05	NGINX Deep Learning	Notes	Sheet	
06	Docker and Containers	Notes	Sheet	
07	VPS and Deployment	Notes	Sheet	
08	AWS Cloud	Notes	Sheet	
09	Scaling and Architecture	Notes	Sheet	
10	Load Balancing	Notes	Sheet	
11	Kubernetes	Notes	Sheet	
12	Final Production Project	Notes	Final Exam	

Legend:  not started ·  in progress ·  notes+lab+recall done ·  assignment passed
