

From Browser to Production

My learning notes: the complete journey of a request from a user's browser to a production server.

```
User Browser → DNS → Internet → Firewall → Load Balancer → NGINX
→ Application Server → Spring Boot API → Database → Cache → Response → Browser
```

How to use this course

- 1. Read one phase's notes (`.md` or `.pdf` — same content, PDF sits next to the Markdown).
- 2. Do the **LAB** section hands-on.
- 3. Solve the **ASSIGNMENT** at the end of the chapter and submit answers to Claude for review/exam.
- 4. Only then move to the next phase. Update the progress table below.

Roadmap & Progress

Phase	Topic	Notes	Status
00	Linux & Terminal Basics (Prerequisites)	Notes	☐
01	Internet Fundamentals	Lesson 01 · Notes	
02	DNS and Domains	Notes	☐
03	HTTP and HTTPS	Notes	☐
04	Linux Server Administration	Notes	☐
05	NGINX Deep Learning	Notes	☐
06	Docker and Containers	Notes	☐
07	VPS and Deployment	Notes	☐
08	AWS Cloud	Notes	☐
09	Scaling and Architecture	Notes	☐
10	Load Balancing	Notes	☐
11	Kubernetes	Notes	☐
12	Final Production Project (Capstone)	Notes	☐

Legend: ☐ not started ·  in progress ·  notes+lab done ·  assignment passed
